ATLAS

of the
BIODIVERSITY of CALIFORNIA

The *Atlas of the Biodiversity of California* contains 112 pages of maps and rich narrative based upon data and information collected over more than 20 years. It is a fascinating, fully illustrated guide to the richness of plant and animal life in the Golden State. Special features include artwork by Dugald Stermer, and photographs from artists around the state.

- Clearly explained biodiversity concepts.
- Filled with stunning maps, photographs, and wildlife illustrations.
- Examines complex relationships between our native species and California's diverse habitats.
- Includes a comprehensive glossary of terms.

The *Atlas* is on sale now for \$20.00 (plus \$2.50 per book for shipping). For more information, visit <http://atlas.dfg.ca.gov>. This website also includes more detailed information about the creation of the book's maps, images of sample pages, links to reviews and articles published about the *Atlas*, and additional purchase outlets for the *Atlas*.
